

Impact of Covid-19 lockdown on (psychosocial) functioning on Dutch long term care residents?

Hein van Hout

hpj.vanhout@amsterdamumc.nl

Webinar entitled
‘International LTC experience during COVID-19: Virtual
Town Hall’ organised by the Provincial Geriatrics
Leadership Office, Ontario, Canada at 25 September

Message for the interested reader

- Thank you for your interest in our research.
- The Townhall presentation of 25 September was based on the results of preliminary analyses.
- A parallel press release in the Netherlands evoked many and often emotional reactions.
- Because of the sensitivity of the subject, we prefer to communicate further once a full scientific paper is prepared in which the context and meaning of results can be discussed in more depth.
